

WisePac® Dry Breather

Indicating silica gel, high moisture absorption capacity. You can tell if the Color changes from orange to green after absorbing moisture

PC shell, high mechanical strength, creep resistance, shock strength

Widely used in gearbox, hydraulic oil, oil tank, transformer, etc. to extend device use life

Standard size design, easy to install

WISORBENT TECHNOLOGY LLC

WisePac® Dry Breather utilize PC material as shell, which has high mechanical strength, creep resistance, shock strength. Indicating silica gel with high moisture absorption capacity is used as desiccant material. You can tell if the desiccant is fully saturated by looking at its color. It is easy to install and can be used in gearbox, hydraulic oil, oil tank, transformer, etc. to prevent contamination and moisture from outside and extend device use life.

WISEPAC® DRY BREATHER ADVANTAGES STANDARD

| ITEM | | STANDARD |
|-----------------------------------------------|--------|----------|
| Loss on Drying | | ≤ 3.0% |
| Moisture Absorption Capacity (77 °F /25°C) | RH=20% | ≥ 8.0% |
| | RH=50% | ≥ 20.0% |

WISEPAC® DRY BREATHER ADVANTAGES SPECIFICATION

* Container: SIZE: L370mm*W275mm*H250mm

| Spec | Product Code | Product Total Weight | Diameter*Height(mm\in) | Packaging Quantity |
|-------|--------------|----------------------|------------------------|--------------------|
| 600g | 60SPL601A | 800-870g | φ108*163 \ φ4.25*6.42 | 9/ctn |
| 1200g | 60SPL602A | 1460-1680g | φ108*255 \ φ4.25*10.04 | 10/ctn |
